The Philosophy of Time

CRITICAL CONCEPTS IN PHILOSOPHY

Edited and with a new introduction by **L. Nathan Oaklander**,
David M. French Distinguished Professor of Philosophy, University of
Michigan-Flint, USA; President of the Philosophy of Time Society,
Fleming Member of Clare Hall, University of Cambridge, UK

What is the nature of temporal passage—the movement of events or moments
from the future through the present into the past? If the future and the past are
not as the present, or is the present—or perhaps the present and the past—all that
count? What role, if any, does language play in giving us an insight into temporal
reality? Is it possible to travel through time into distant regions of the future or the
past? What accounts for the direction of time? *Do we have that we are coming
toward the future and not back into the past?* What is the relation between the
physics of time and the philosophy of time?

These are the kind of exciting questions that have been addressed by metaphysicians,
time theorists, and time travellers, and that remained a central concept for many thinkers and
philosophers since that time. In his *Confessions*, St. Augustine, writing an
observation by Thomas Aquinas: 'So when it time if no one asks me, I know, if I seek
no explain it, I do not.' However, the subject has also been modern—and has
remained one of the most central.

The Philosophy of Time is a new title in the Routledge series, Critical Concepts in
Philosophy. It meets the need for an authoritative reference work in public service of
the subject's vast literature and the promising expansion in research output. Edited by
L. Nathan Oaklander, a leading scholar in the philosophy of time, this new Major
Works number in five volumes the canonical and the very best cutting-edge
scholarship in the field to provide a complete view of all the key issues and current
debates.

With a comprehensive introduction to the collection, new writers by the editors
will provide the collected material in an historical and intellectual context. The
Philosophy of Time is an essential work of reference and is deemed to be edited by
philosophers of time—as well as those working in related areas of philosophy of
science, philosophy of mind, and philosophy of religion—a vital research resource.
