## How to Play Scrabble

To play Scrabble, follow these steps:

1.

Place the board in front of you. The board is a 15x15 grid with 225 squares. The squares are divided into three types:

- **Normal squares:** These squares have no special properties.
- **Premium letter squares:** These squares double the score of any letter that is placed on them.
- **Premium word squares:** These squares double the score of any word that is formed on them.

2.

Each player draws a rack of 7 letter tiles from the bag. The player with the highest-scoring letter tile goes first.

3.

On your turn, you must play a word on the board. The word must connect to at least one other word on the board. The word must also be a valid English word.

4.

After you have played a word, your score is calculated. The score is based on the point values of the letters in the word, and any bonuses that you earned from using premium letter or word squares.

5.

The game continues until one player has used all of their letter tiles. The player with the highest score wins the game.
