In this shocking and revealing diary, a medical student chronicles her experiences working in a hospital that is a world away from the sterile and efficient institutions she had imagined. From the moment she steps inside, she is confronted with a litany of horrors that will haunt her for years to come.

There are the patients: a young woman who has been brutally attacked, a child who is dying of cancer, and an elderly man who is slowly succumbing to dementia. There are the doctors: overworked, underpaid, and often jaded. And then there is the hospital itself: a labyrinth of decaying corridors

and cramped rooms, where death and despair seem to lurk around every corner.

As the student progresses through her training, she witnesses firsthand the toll that the hospital takes on its patients, its staff, and herself. She sees how the system can fail the people it is supposed to help, and how the pursuit of profit can come at the expense of human lives.

Diary of a Medical Student: Hospital of Horrors is a powerful and disturbing indictment of the healthcare system. It is a must-read for anyone who has ever wondered what really goes on behind the closed doors of a hospital.
